

The James & Nicholson line has been enlarged by functional and high-quality work wear and safety wear in a fashionable design, thus meeting the demands of day-to-day life.

High-quality, pre-shrunk cotton guarantees that Workwear-T and -Polo will keep their shape to perfection, and ample cuts make the garments very comfortable and lend them a pleasant appearance. Dye-stuffs with a high colour-fastness are used, which guarantee that sweat and the exposure to direct strong sunlight will not affect the colour.

Our safety jackets, vests and blousons are made of durable polyester-fabric and afford workmen and industrial workers protection as well as a high degree of comfort. The same goes for people wearing these garments for leisure activities or promotional purposes.

Safety Wear complies with the European EN-standard 471 for high visibility clothing.

This requires a fluorescent fabric in signal colours and a reflective material. This standard lays down how much of the reflective material each class has to contain.

EN 471 class 1 guarantees the lowest degree of protection and should only be used if there is little contact with vehicles.

EN 471 class 2 affords protection during the day, when it is foggy, at dawn/dusk, on building sites, in car parks, at stations.

EN 471 class 3 guarantees the highest degree of protection and is suitable for heavy traffic and dangerous situations.
